BEFORE INSTALLATION: Check all components to ensure there is no visible damage. Should there be any damage, contact Ventair support via email: support@ventair.com.au or ph: (03) 9775 0556 to discuss.

WARRANTY PERIOD: This product is covered against manufacturing defects by a five (5) year limited warranty. This warranty covers you for two (2) years on parts and labour (in-home) followed by an additional three (3) year replacement warranty on the motor(s). During this period Ventair will, at our discretion, supply parts or provide a replacement unit of the same or comparable model.

IN-HOME WARRANTY SERVICE: Will not be performed to replace anything damaged, scratched, or marked. The product must be installed for the in-home warranty to be valid. This service is only available for components that require an electrician to install. This service is only available for standard residential installs and must be within 25km of the nearest Ventair service agent.

COMMERCIAL USAGE: All products have a maximum one (1) year warranty when used in a commercial setting and 'in home' service is not applicable.

SPEED VARIATION: Due to normal manufacturing tolerances, a slight variation in fan speed may occur between units. This is a normal result of the production process and does not affect the product's overall performance or reliability.

UNUSUAL MOTOR NOISE: Unusual motor noise caused by harmonics (often from ripple control or solar inverters) is not a manufacturing defect.

PLEASE NOTE: Where applicable, LED lights carry a two (2) year replacement warranty.

The Ventair warranty Terms & Conditions available at www.ventair.com.au/warranty must be met.

- The unit or relevant part must not have been physically damaged, involved in an accident, or modified. Additionally, it must not have been subjected to misuse, neglect, or abuse. The fault must not be a result of normal wear and tear.
- No solid state speed control device has been used with this appliance.
- The product must be installed by a licensed electrical contractor (where applicable) and in accordance with the instruction manual using the supplied Ventair hardware.
- This fan does not have an IP (Ingress Protection) rating and is therefore only suitable for indoor and covered outdoor areas.
