

Laiton Garden Spike Light Installation Instructions

Product Specifications

Model No.	HV1451T
Name	Laiton
Material	Solid Brass
Colour	Antique Brass
IP Rating	IP54
Input Voltage	12v DC
Lamp Base	mr16
Lamp Wattage	1x 5w
Colour Temp	TRI Colour - 3000k, 4000k, 5500k
Lumens	270lm, 285lm, 300lm
CRI	> 80
Wiring	Parallel
Dimmable	No
Warranty	2 Years Replacement*

Important Safety Issues:

- This product must be installed by a qualified electrician according to AS/ NZS 3000.
- Ensure all electrical mains are disconnected before any installation.
- Do not exceed maximum wattage restrictions for globes: 240V GU10 = 35w / 12V MR16 = 20w
- Modification of this product will void any warranty.
- Havit Lighting does not take responsibility for wrong installation, incorrect use, or use of installation material that does not belong to the system.
- When installing low voltage fittings, Voltage to fitting must be within +or- 5% of voltage required and cannot be installed more than 25m from LED Driver, if not within this allowance warranty will be voided.
- Aluminium and 304SS fittings must not be installed within 2km of any salt water environments.
- When installing copper fittings, gloves must be worn to avoid any oils transferring to fitting.
- All 316 stainless steel fittings must have regular cleaning maintenance to avoid any tea staining from forming on fitting. (Warranty does not cover Tea Staining)
- All o-rings and seals must be in place correctly to maintain warranty.
- These instructions may be updated at any time due to product improvements, Please visit website for most current installation instructions.

Dimensions

Steps for Installation:

1. Make sure that the electrical circuit is free of voltage (master switch off)
2. Place fitting in desired location
3. Connect the cable -
4. Use an appropriate 12v DC LED Driver - DO NOT CONNECT LIGHT FITTING DIRECT TO 240V
 - Strip back cable on both fittings and cable run and twist the positive cable from fitting to positive on the cable run, then connect neutral from fitting to neutral on the cable run.
 - Solder all joins using solder with either a heat gun or butane gas torch.
 - Cover connections using an adhesive lined heat shrink or gel cap to make connection watertight. (failure to do this step will void warranty)
 - Heat the heat shrink or crimp the gel cap making sure all connections are covered.
5. Colour temperature is preset to 3000k, to change remove cover by twisting while pulling gently. Remove globe and select desired colour temperature by moving switch on side of globe and then reinsert globe back into lampholder.
6. Reattach cover by pushing down gently making sure the seals are still in place to avoid any water penetration.
7. Adjust fitting to desired position making sure to stop rotating when fitting cannot rotate anymore, If forced fitting will continue to rotate and cause internal cables to become entangled causing fitting to short. If this is done, warranty will be voided.
8. All connections must be carried out carefully, inspect all contacts before switching back on the electric circuit.

Must be installed by a licensed electrician
