## **Important Safety Issues:**

- This product must be installed by a qualified electrician according to AS/NZS 3000.
- Ensure all electrical mains are disconnected before any installation.
- Modification of this product will void any warranty.
- Havit Lighting does not take responsibility for wrong installation, incorrect use, or use of installation material that does not belong to the system.
- When installing low voltage fittings, Voltage to fitting must be within +or- 5% of voltage required and cannot be installed more than 25m from LED Driver, if not within this allowance warranty will be voided.
- Aluminium and 304SS fittings must not be installed within 2km of any salt water environments.
- When installing copper fittings, gloves must be worn to avoid any oils transferring to fitting.
- · All 316 stainless steel fittings must have regular cleaning maintenance to avoid any tea staining from forming on fitting. (Warranty does not cover Tea Staining)
- All o-rings and seals must be in place correctly to maintain warranty.
- · These instructions may be updated at any time due to product improvements, Please visit website for most current installation instructions.

## **Steps for Installation:**

- 1. Make sure that the electrical circuit is free of voltage (master switch off)
- 2. Make a hole where fitting is to be placed using dimensions provided on line drawings, making sure adequate drainage is allowed.
- 3. Using an appropriate 12v DC LED Driver DO NOT CONNECT LIGHT FITTING DIRECTLY TO 240V
- 4. If installing into concrete, insert canister making sure it is flush with ground level.
- 5. Connect the cable If more than one fitting installed, wiring must be done in parallel.
- 6. Strip back the cable on both fitting and cable run and twist the positive cables together. Then connect neutral cables together
- 7. Solder all joins using solder and either a heat gun or butane gas torch.
- 8. Cover connections using an adhesive lined heat shrink or gel cap to make connection watertight. Failure to do this will void warranty.
- 9. Heat the heat shrink or crimp the gel cap making sure all connections are covered.
- 10. Insert fitting into hole or canister
- 11. Apply silicon around edge of fitting to prevent any water from getting inside to electrical connections.
- 12. All connections must be carried out carefully, inspect all contacts before switching back on the electric circuit.

## Must be installed by a licensed electrician

143 Beauchamp Road Matraville NSW 2036 Australia
