MXFC25W

Dear customers,

Thank you for selecting Martec exhaust fan. Please read all instructions before commencing installation.

IMPORTANT: This unit must be installed to comply with the appropriate council regulations and the Australia and New Zealand wiring rules AS/NZS3000:2000 or latest edition thereof.

The main supply, switches and interconnecting cables required for installation of this unit are not included.

INSTALLATION INSTRUCTIONS

1. Choose the desired position to mount the fan and ensure there are no hidden obstructions, wires or pipes.
2. Use the template to mark the mounting hole.
3. Use a jigsaw, keyhole saw, or other appropriate method to cut along marked line.
4. Remove the grille, make electrical connections and insert fan assembly into hole.
5. Ensure flex is not fouling fan blades.
6. Ensure ceiling insulation is not obstructing airflow.
7. Push the mounting clamps and tighten the screws until the fan is firm against the ceiling. Do not overtighten.
8. Replace the grille over assembly and press up till the catches properly fixed.
9. Use a lint cloth to remove any finger marks.

CAUTION

1. The fan must have at least 50cm clear space above the fan blades. However we recommend and the Australian Building Code requires all fans to be ducted to the outside, so when used with an appropriate ducting kit this clearance is not required.
2. When using a ducting, it is recommended that the diameter over the full length shall be no smaller than the diameter of the fan blades, and be no longer than 3 metres. Restrictions of any kind will affect performance.
3. To function correctly, fan must have free air. In some instances a return air grille may be required.
4. Electrical wiring must be carried out by a licensed electrician.
5. The unit is not intended for use by young children or infirm persons unless they have been adequately supervised by a responsible person to ensure that they can use the unit safely.
6. Young children should be supervised to ensure that they do not play with the unit.

7. If the supply cord is damaged, it should be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

8. The disconnection may be achieved by having the plug accessible or by incorporating a switch in the fixed wiring in accordance with the wiring rules. The fan must be isolated from the power by means of a plug or all-pole disconnection switch with a contact separation of at least 3mm in each pole.

CLEAN WHEN DIRTY OR CLOGGED

Dirty fan blades and clogged grilles can drastically reduce the fan's working life and void warranties. Regular cleaning will ensure many years of useful service.

CLEANING INSTRUCTIONS

Note: Ensure that the fan is switched off from the supply mains before removing the guard.

GRILLE

Remove and wash in warm soapy water then rinse. Cloudy ammonia is recommended with a bottle brush for stubborn grease.

FAN BLADE

Wipe blade with a rag moistened with the above solution. NEVER immerse the motor in cleaning solution or any other liquid.

REPLACEMENT WARRANTY

This product is guaranteed against defects in materials and/or workmanship under normal domestic use for 36 months from date of purchase.

Except as otherwise provided for by law, this guarantee becomes invalid if in the opinion of the Company the product has been misused, abused, damaged in transit, incorrectly installed, tampered with by any unauthorized person, or connected to an electrical supply not corresponding with the product's specifications.

If any part thereof proves to be defective within the warranty period, such defective part will be replaced free of charge. Please retain your purchase receipt and present the receipt to the store of purchase for replacement. Martec is not responsible for freight charges or losses in transit.

ACCC Required Statement

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to Martec replacing the product in home with parts and labour for a major failure. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. Martec offers an in home warranty that includes parts and labour so the end consumer is not out of pocket.

Minor design changes or otherwise may result in slight variations between the product illustrated and that which is contained in this package.
