

SENSOR-INT-ON/OFF

Internal Sensor - ON/OFF

Description

SENSOR-INT-01 is a range of internal microwave sensors designed specifically to be internally mounted into luminaires, such as LED Batten Lights. Available in an ON/OFF model, which as it suggests, will switch the luminaire on and off when triggered. Also available with DIM function, to allow for the luminaire to turn on at desired percentage lux levels. To change sensor default settings, a remote is required, sold separately. One remote control will operate unlimited sensors for future installations. Backed by a 5 Year Warranty.

Specification Features

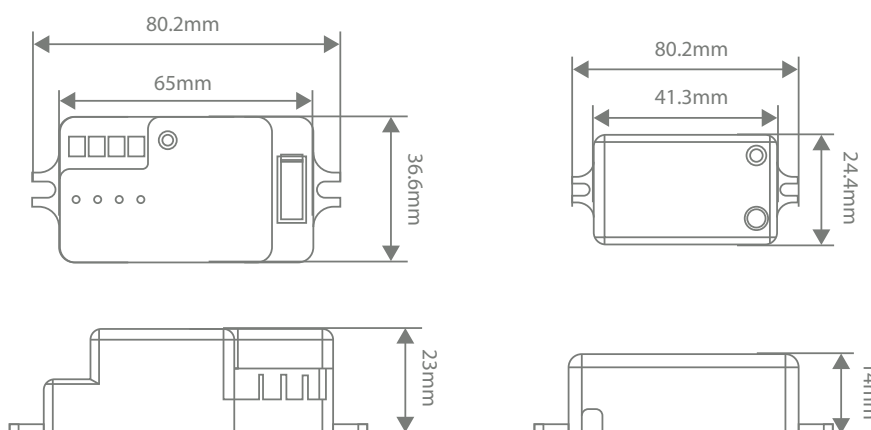

Input Voltage:	240VAC
Rated Load(W):	400W LED
IP rating (IP):	IP20
Detection Range:	Max 2-6m (<24°C)
Installation Height:	2.5-6m
Time Delay:	5sec, 1min, 5min, 10min
Lux Adjustable:	2 lux, 10 lux, 50 lux, disable
Working Temperature:	-20°C~+60°C
Size:	65x36x23mm & 41x24x14mm
Compliance:	Fully Compliant to AS/NZS2293.3

Note: To change settings, a remote is required. One remote control will operate unlimited sensors for future installations.
